

Virtual Recruiting – Industry Info Sessions – fall semester 2020

Many of our employer partners enjoy visiting campus to talk with our students about careers with their company and while we look forward to welcoming you to campus again in the future, for now, we will only be hosting industry information sessions and recruiting events virtually.

*Traditional Schedule [pre COVID-19]: Our **PROGRAM MAJORS** are located across four campuses (see 2nd page). Unlike traditional college schedules, ALL of our students are required to be in their major (shop) courses 4.5 hours a day Monday – Friday. This is in addition to a number of required general education classes.*

- *AM Shop Time: 7:30am – 12:00pm*
- *PM Shop Time: 12:00pm – 4:30pm*
- *Evening Shop Time 5:30pm – 10:00pm*

Fall 2020 [COVID-19] Hybrid Schedule: Please see the college's [Fall Reopening Plan](#) for a full breakdown of the schedule for each program major. In accordance with the college's COVID-19 response plan, at this time, Thaddeus Stevens College is restricting campus visits.

Basic Virtual Info Sessions:

- **Multiple Majors** – schedule a virtual information session whereby students from multiple program majors can “Zoom in” to attend. It does not matter whether they are currently on campus or at home completing their courses virtually. Offering two separate sessions in one day (one in the morning and one in the afternoon) will likely accommodate most academic schedules without interrupting scheduled class time. This can be scheduled at any time.
- **One Program Major** – schedule an information/recruiting session with an entire class from one particular program major at either the beginning or end of one of their theory sessions. This could be during an AM session or a PM session. We would need to coordinate this with each respective Technical Faculty member, so please note it may take longer to schedule and may not be available for all programs.

Lunch & Learn Virtual Info Sessions:

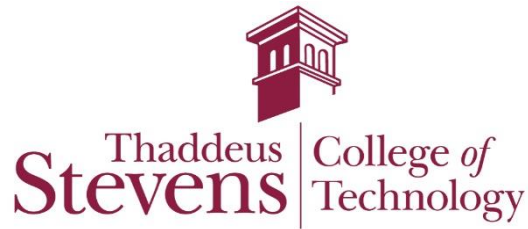

- Scheduling/timing would be the same as above, but with FOOD! Let me know if you are interested and I can give you more details. Common easy lunch items include Pizza, Subway, Chick- Fil- A... any place that delivers works! During the Fall 2020 semester, this type of information session would work well with one individual class/group of students from a specific program major that is on-campus. They could be eating their lunch while you are “Zooming” with them.

Annual Job Fairs – Since students graduate in May of each year, we typically host two job fairs in February. These are designed specifically for industry and students to meet face-to-face and connect for full-time jobs and internship opportunities. Technical Faculty and students from all program majors attend these events. For more information on these events and *changes due to COVID-19*, please visit the [Job Fairs & Career Events](#) page of our website often.

PREPARE FOR WORK | PREPARE FOR LIFE

Program Major Campus Locations ([CAMPUS MAP](#))

Main Campus (750 East King Street):

- Automotive Technology (**moving to Transportation Center fall 2021**)*
- Cabinet Making & Wood Technology
- Carpentry Technology (Freshmen) – Sophomores have their class time at the House Project
- Collision Repair Technology (**moving to Transportation Center fall 2021**)*
- Computer & Network Systems Administration (+ Evening Cohort)
- Electrical Technology
- Electro-Mechanical Technology
- Electronic Engineering Technology
- Plumbing Technology

Orange Street Campus (1100 Orange Street):

- Architectural Technology
- Business Administration
- Electrical Construction & Maintenance
- Engineering CAD Technology
- Graphic Communication & Print Technology
- Mechanical Engineering Technology
- Metals Casting & Manufacturing Management
- Residential Remodeling
- Water & Environmental Technology

Greenfield Campuses

- **(1812 Colonial Village Lane)**
 - Computer Software Engineering Technology
 - Masonry Technology
 - Welding Technology
- ***New Transportation Center (coming fall 2021)**
 - Automotive Technology
 - Collision Repair Technology
 - Diesel Technology (**starting Fall 2021**)

Greiner Advanced Manufacturing Center (599 Chesapeake Street):

- Computer Integrated Machining (+ Evening Cohort)
- Heating, Ventilation, Air Conditioning/Refrigeration (+ Evening Cohort)
- Metal Fabrication & Welding Technology
